

Galaxy 6 days C

Galaxy is a beautiful motor yacht, launched in 2007, excellent crew, good food and very spacious and comfortable interiors. Run by a local company with a very good reputation and has first rate naturalists on board it has been one of our favourite yachts in recent years. The yacht is relatively fast, which means less time navigating than on slower yachts. The cabins are all very spacious with comfortable lower beds and outside views, very good value for the quality of service and comfort afforded. This 6 day itinerary takes you to the Central, Northern and Eastern part of the archipelago, with a very good range of islands and a great mixture of Galapagos wildlife. A highlight of the trip will be your visit to the beautiful Genovesa Island, one of the outpost islands for seabirds.

Day 1 Arrival in Baltra Islet – Galapagos

Santiago – Sullivan Bay This site is of great geological interest and is located southeast of Santiago Island. Sullivan Bay offers a rare look at a recently formed lava-field. Located on the eastern coast of James Island, just across from Bartolome, this lava field is thought to have been created in eruptions that took place around 1890.

Activities: Hike (1.3 mi / 2 km) swimming and snorkelling

Difficulty: Moderate.

Type of Landing: Dry landing at the rocky shore and a wet landing at the white sand beach

Highlights & Animals: Pahoehoe lava flows, which has hardened in accordion-style formation. Small glass-like bubbles of lava can be found, called “hornitos”. Penguins in the coastline.

Day 2 Bartolome Home to one of the most iconic scenery shots of Galapagos, this small island is located off the eastern shore of Santiago Island. The striking volcanic landscape looks almost lunar and provides a great introduction to the volcanic origins of the islands, with spatter cones and cinder cones some of which are eroded shaping striking formations like Pinnacle Rock. On the way to the top of Bartolome you will observe good examples of pioneering plants, including some beautiful strands of lava cactus. At sea level, this is a great place for swimming and snorkelling, if you are lucky with Galapagos Penguins.

Activities: Dinghy ride & snorkelling. Hike uphill (1.2 mi / 2 km)

Difficulty: Moderate/ difficult. Walk up to the top of volcano 114 meters, 375 wooden steps.

Type of Landing: Dry and wet landing

Highlights & Animals: Pinnacle rock, panoramic view, moonlike landscape, Penguins, pioneer plants, lava cactus. Snorkelling: Penguins, Reef Sharks, Rays great colourful fish.

Santa Cruz - Bachas Beach A beautiful white sandy beach punctuated by lava formations. The wonderfully soft sand here makes it a favourite site for nesting Sea Turtles. Here you will also see White Mangroves, one of the four mangrove species found in the Galapagos. There is a small coastal lagoon behind the sand dunes where Flamingos, Stilts, Pintail ducks and other water birds are regularly seen.

Activities: Walking along the beach, swimming, snorkelling. **Difficulty:** Easy
Type of Landing: Wet landing
Highlights & Animals: World War II remnants, Sally Lightfoot crabs, Hermit Crabs, Black Necked Stilts, Whimbrels, Flamingos, Sea Turtles

Day 3 North Seymour

A great variety of Galapagos wildlife is provided in the loop trail on this small island. The highlight of your visit here will be the largest colony of Magnificent and Great Frigatebirds in the Galapagos as well as a colony of Blue-footed Boobies. In addition there are Sea lions, Marine Iguanas, Lava Lizards, Swallow-Tailed Gulls, and a few secretive, but very large Land Iguanas.

Activities: Hiking(1.5 mi/2.2 km), Snorkelling & dinghy ride
Difficulty: Moderate/difficult
Type of Landing: Dry landing
Highlights & Animals: Land & Marine Iguanas, Frigatebirds, Blue-footed Boobies, Sea Lions, sea birds. Snorkelling: Rays, Reef Shark, fish, Garden Eels

Day 3 Mosquera This tiny islet, nestled between Baltra and North Seymour islands is a beautiful long narrow beach with a large population of Galapagos Sea Lions. As with other areas in Galapagos this area has been geologically uplifted. A great opportunity for swimming and snorkelling off the beach.

Activities: Wet landing. Short walk along the beach (0.5 Mi). Snorkel.

Difficulty: Easy

Type of Landing: Wet landing

Highlights & Animals: Galapagos Sea lion colony, Lava Gulls, Herons. Snorkel: Sharks, Rays, Parrotfish, Angelfish

Day 4

Genovesa (Tower)

A highlight of any visit to the Galapagos, a truly beautiful island thanks to the richness of its birdlife. Located in the northeast portion of Galapagos, the island is an outpost for many seabirds (as is Espanola in the South). Interestingly there are no land reptiles here and only very small Marine Iguanas, due to direction of ocean currents which apparently would not have carried terrestrial animals here. You will visit the following sites.

El Barranco or Prince Philip's Steps The tour begins with a great dinghy (small dingy) ride along the base of the cliffs where you see Red-billed Tropicbirds trying to make a precise landing in their nest. Squadrons of Frigatebirds are seen flying back and forth, whilst Red-footed Boobies perch on branches of Palo Santo trees which seemingly grow out of the cliffs. Once you arrive on land and climb to the cliff-top, you enter an area where nesting Nazca Boobies and Great Frigatebirds are found. It is also a great place to see Galapagos Doves and Vampire Finches (Sharp-beaked Ground finches)...ask your guide for the full story on the name! You will also see a large colony of Storm Petrels which attracts Short-Eared Owls, often observed stalking at these small sea birds, even during the day.

Activities: Hike (0.9 mi / 1 ½ km)

Difficulty: Moderate

Type of Landing: Dry, difficult landing

Highlights: Red-footed Boobies, Great frigatebirds, Short-eared Owls, Storm-petrels, Galapagos Doves, Darwin Finches.

Genovesa - Darwin Bay This bay is actually the caldera of an extinct, partially eroded volcano, with the surrounding cliffs forming the inner portion of the rim. You will land on a coral beach, and will immediately be struck by the amount of birdlife. The trail is loaded with Great Frigatebirds (mating season from February to May), Red-footed Boobies nesting in the mangroves, Swallow-tailed Gulls, Lava Gulls, Yellow-Crowned Night Herons. Your trail takes you past a beautiful tide pool area Herons try to catch small fish.

Activities: Hike (0.9 mi / 1 ½ km), snorkelling, kayaking & dinghy ride

Difficulty: Easy/moderate

Type of Landing: Wet landing.

Highlights: Nazca Boobies, Red-footed Boobies, Great Frigatebirds, Swallow-tailed Gulls, mangroves, coral pebbles beach. Snorkelling: rays, colourful reef fish and Hammerhead Sharks

Day 5

Santa Cruz – Cerro Dragon or Dragon Hill After a dry landing, the walk will take you along the edge of a salt water lagoon behind the beach where you can often see Flamingos, Pintail Ducks, Common Stilts and other bird species. A short walk inland, offers a great view of the bay and a nesting site for Land Iguanas, many of which were repatriated back to Cerro Dragon by the Charles Darwin Research Station, after their near-extinction due to feral dogs and cats.

Activities: Hiking 1.5 mi. Snorkelling

Difficulty: Moderate

Type of Landing: Dry landing

Highlights & Animals: Coastal lagoon with variety of water birds: Herons, Stilts, Pintail Ducks, Oystercatchers, Flamingos. Giant Cactus, Land Iguanas, Darwin Finches, Mockingbirds. Snorkel: Parrotfish, Puffers, Snappers, Sea Turtles.

San Cristobal - Leon Dormido Sometimes called Kicker Rock, Leon Dormido is a huge rock formation near the coast of San Cristobal, an eroded cinder cone with two vertical rocks rising over 150 meters from the ocean, and a favourite spot for Tropicbirds along with Great and Magnificent Frigatebirds. You will visit this site by boat and it is a great spot for snorkelling.

Activities: Snorkelling & dinghy Ride

Difficulty: Easy

Type of Landing: No landing

Highlights: Deep water snorkelling: Sharks, tropical fish, Turtles, Manta rays, Hammerhead shark, spectacular rock formations, sea birds: Blue-footed Boobies, Nazca Boobies & Frigatebirds.

Day 6 San Cristobal – Puerto Baquerizo and the Interpretation Centre The easternmost island in the archipelago, this island has a small town, Puerto Baquerizo Moreno and is home to a fantastic interpretation centre, which provides an excellent overview to the islands human history and the conservation work being done to protect it.

Activities: Easy hike (0.2 mi / 0.3 km)

Difficulty: Easy

Type of Landing: Dry landing

Highlights & Animals: Interesting information centre focused on the human history of the islands. Around the centre, Finches, Mockingbirds and endemic plants.

After this final visit, you will be transferred to San Cristobal airport for your flight back to the mainland, or you could continue your Galapagos adventure with a stay in one of the inhabited islands.

Please note: *Itineraries are unlikely to change significantly but are subject to change. Weather, wildlife breeding, instructions from the Galapagos National Park, specific abilities and interests of passengers as well as operational matters may cause your guide or captain to change the times or nature of your visits. Your guide will always endeavour to have the best itinerary for you within these constraints.*
