

Seaman Journey 4 Days

M/C Galapagos Seaman Journey is a first-class catamaran that began sailing the Galapagos Islands in January 2008. She is a first-class expeditionary catamaran offering superior comfort, size, style, and stability. The catamaran's large, comfortable double cabins with outside views, private bathrooms, hot water, a locker and closet.

The spacious rooms each have full air-conditioning and individual climate control.

On-board you'll also find a comfortable dining room, two bars, a lounge, library,

TV/DVD, stereo, first aid, an ice maker, observation deck, a water purifier and spacious sundeck with chairs for relaxing in the sea breeze. A very helpful friendly crew with great service and very good naturalist guides.

Day 1 Arrive Baltra

You arrive to the airport where you will be met by your guide and the crew from the Seaman Journey. You will be taken to board your yacht, and will enjoy a delicious lunch as you set off navigating to your visit visitor site and your Galapagos experience will begin.

North Seymour

A great variety of Galapagos wildlife is provided in the loop trail on this small island. The highlight of your visit here will be the largest colony of Magnificent and Great Frigatebirds in the Galapagos as well as a colony of Blue-footed Boobies. In addition, there are Sea lions, Marine Iguanas, Lava Lizards, Swallow-tailed Gulls, and a few secretive, but very large Land Iguanas.

Activities: Hiking (1.2 mi / 2 km), Snorkelling & dinghy ride

Difficulty: Moderate/difficult

Type of Landing: Dry landing

Highlights & Animals: Land & Marine Iguanas, Frigatebirds, Blue-footed Boobies, Sea Lions, sea birds. Snorkelling: Rays, Reef Shark, fish, Garden Eels

Day 2 Genovesa (Tower)

A highlight of any visit to the Galapagos, a truly beautiful island thanks to the richness of its birdlife. Located in the northeast portion of Galapagos, the island is an outpost for many seabirds (as is Española in the South). Interestingly there are no land reptiles here and only very small Marine Iguanas, due to direction of ocean currents which apparently would not have carried terrestrial animals here. You will visit the following sites.

Genovesa - Darwin Bay

This bay is actually the caldera of an extinct, partially eroded volcano, with the surrounding cliffs forming the inner portion of the rim. You will land on a coral beach, and will immediately be struck by the amount of birdlife. The trail is loaded with Great Frigatebirds (mating season from February to May), Red-footed Boobies nesting in the mangroves, Swallow-tailed Gulls, Lava Gulls, Yellow-crowned Night Herons. Your trail takes you past a beautiful tide pool area where herons catch small fish.

Activities: Hike (0.9 mi / 1 ½ km), snorkelling, kayaking & dinghy ride

Difficulty: Easy/moderate

Type of Landing: Wet landing.

Highlights: Nazca Boobies, Red-footed Boobies, Great Frigatebirds, Swallow-tailed Gulls, mangroves, coral pebbles beach. Snorkelling: rays, colourful reef fish and Hammerhead Sharks

El Barranco or Prince Philip's Steps

The tour begins with a great dinghy ride along the base of the cliffs where you see Red-billed Tropicbirds trying to make a precise landing in their nest. Squadrons of Frigatebirds are seen flying back and forth, whilst Red-footed Boobies perch on branches of Palo Santo trees which seemingly grow out of the cliffs. Once you arrive on land and climb to the cliff-top, you enter an area where nesting Nazca Boobies and Great Frigatebirds are found. It is also a great place to see Galapagos Doves and Vampire Finches (Sharp-beaked Ground Finches) ...ask your guide for the full story on the name! You will also see a large colony of Storm Petrels which attracts Short-eared Owls, often observed stalking at these small sea birds, even during the day.

Activities: Hike (0.9 mi / 1 ½ km)

Difficulty: Moderate

Type of Landing: Dry, difficult landing

Highlights: Red-footed Boobies, Great Frigatebirds, Short-eared Owls, Storm Petrels, Galapagos Doves, Darwin Finches.

Day 3 South Plaza

This is the best island for observing Land Iguanas, along with Cactus Finches, Tropicbirds and Sea Lions. One of your first stops will be through a small "forest" of Prickly Pear Cactus. The walk along the sea cliffs is a wonderful experience, with Galapagos Shearwaters and Red-billed Tropicbirds gliding by. Towards the end of the walk is a bachelor Sea Lion colony, with a battle-scarred collection of old bulls in various states of recuperation or total retirement!

Activities: Hike (0.8 mi / 1.2 km)

Difficulty: Moderate

Type of Landing: Dry landing

Highlights & Animals: Land Iguanas, Sea Lion colony, Galapagos Shearwaters, Swallow-tailed Gulls, Nazca Boobies, amazing landscape with cliffs

Santa Fe

This is the oldest of the Galapagos islands. Its paradisiacal bay offers great possibilities to swim and snorkel in crystal clear waters. A hike inland offers a great chance to see a species of Land Iguanas (*Conolophus pallidus*) which is endemic to Santa Fe Island. In the same area, you'll also see a forest of Giant Prickly Pear Cactus. After your visit, you can swim and snorkel both inside and outside the bay.

Activities: Hiking, Snorkel

Difficulty: Moderate

Type of Landing: Wet landing

Highlights: Santa Fe Land Iguanas, Sea Lion colony, Galapagos Hawks, Mockingbirds, Giant Prickly Pear Cactus (the tallest in Galapagos). Snorkel: Sea Lions, Reef Sharks, Parrotfish, Surgeonfish.

Day 4 San Cristobal – Galapaguera- Cerro Colorado

Located in the south east of San Cristobal, this area is home to giant tortoise confinement corral, where tortoises are kept in near-natural conditions. The site has been developed to help restore the Giant Tortoise population of the Island (which was badly impacted by whalers in past centuries) and provides a great chance to see

these magnificent giants up close in a natural habitat with paths covering an area of 900 meters. You will also have great chances of seeing the San Cristobal Mockingbird, Woodpecker Finch and Large and Small Tree Finches here. It is also one of the few places that you can see the delicate *Calandrinia galapagosa*, a critically endangered plant endemic to San Cristobal.

Activities: Short hike (less than 0.6 mi / 1 km).

Difficulty: Easy

Type of Landing: No landing

Highlights: Dry vegetation of lowlands. Giant Tortoises, San Cristobal Mockingbird, Darwin Finches

After this final visit, you will be transferred to Baltra's airport for your flight back to the mainland, or you could continue your Galapagos adventure with a stay in one of the inhabited islands.

Please note: *Itineraries are unlikely to change significantly but are subject to change. Weather, wildlife breeding, instructions from the Galapagos National Park, specific abilities and interests of passengers as well as operational matters may cause your guide or captain to change the times or nature of your visits. Your guide will always endeavour to have the best itinerary for you within these constraints.*
